GE Druck Series 1000 Pressure Transducers - Canadian Relaunch

CSA certified to ANSI/ISA - 12.27.01-2003 CRN numbers for all Canadian provinces

On behalf of GE Sensing, Procon Systems is pleased to announce that the GE Druck series 1000 pressure transducers are now **CSA** certified to comply to the single seal requirements of **ANSI/ISA - 12.27.01-2003** for Process Sealing between Electrical Systems and Flammable or Combustible Process Fluids. No secondary seal is required.

In addition, the series 1000 pressure transducers now have current **Canadian Registration Numbers (CRN)** for "All provinces in Canada".

Although no design changes were required to meet the ANSI/ISA - 12.27.01-2003 standard, or the CRN requirements, the process to obtain these certifications was lengthy and laborious.

In appreciation of end-user patience and support, we are relaunching this widely accepted line of quality pressure transducers to the Canadian market, at **significantly reduced prices**. Please contact us for pricing and delivery.

Druck quality, and best pricing Ever!! New stock!!

The following GE Sensing (Druck) pressure transducers are covered under these approvals:

PTX (4-20mA style):

PTX 1000, 1010, 1020, 1025, 1030, 1040, 1050, 1060, 1065, 1070, 1200, 1210, 1220, 1225, 1240, 1250, 1260, 1265, and 1270. Pressure ranges: 0 to 1 psi thru 0 to 4,350 PSI.

PMP (1-5Vdc style):

PMP 1000, 1010, 1020, 1025, 1030, 1040, 1050, 1060, 1065, 1070, 1200, 1210, 1220, 1225, 1240, 1250, 1260, 1265, and 1270. Pressure ranges: 0 to 1 psi thru 0 to 4,350 PSI.
