Product News

Manufacturer: GE Panametrics
Product: PT868
Category: End of Support – Trade Up Offer
Date: 09/22/10
Subject: End of Repair and Support Cycle

Our TransPort PT868 portable liquid flowmeter is facing the end of inventory of parts and unfortunately we will soon be unable to repair it. At this time, we are not announcing a final support date but rather we will continue to service and repair all PT868's as long as the required parts are available. However, in order to support that effort, we are providing an incentive for you to upgrade your existing PT868 with the newer PT878 which has all of the features of the PT868 as well as the following additional features and benefits:

- Improved Reynolds correction
- Faster signal detection for quicker startup response
- IP (ingress protection) rated for submersion in water
- More rugged design for better durability
- Larger and higher resolution display with greater contrast
- NiMH battery with longer operating time
- Complete compatibility with your existing transducers, cables and clamping fixtures
