

March 14, 2016

For 23 years Procon Systems has been your source for sales and service of ultrasonic flow and moisture analyzer solutions in Western Canada. All of our custom solutions have been and continue to be designed, engineered, manufactured, calibrated, and certified by Procon.

Some of the components used during our manufacturing process were sourced from GE Measurement and Control. We are announcing that as of March 25, 2016 our formal business relationship with GE will be coming to an end.

**Rest assured that Procon Systems will continue to offer full service, calibration and support on all GE components moving forward.**

The Procon team that you have trusted to supply 1000+ flowmeter and 500+ analyzer solutions remains intact. **Building on our 23 years of expertise, Procon will continue to be your source for ultrasonic flow and moisture analyzer solutions.**

We look forward to continuing and growing our existing business relationship with you and are committed to providing the same quality service and solutions you have come to expect.

Should you have questions regarding this announcement or any of our products and services please feel free to contact us.

Thank you,
