A4

The Digital Output Module is used for connecting of up to 8 intrinsically safe solenoid valves, indication or signal elements to the IS1 remote I/O system. All channels are individually monitored for wire breakage and short-circuit. The Ex i outputs are short-circuit proof, galvanically connected to each and galvanically separated from the system.

Compatible spare for IS1 I/O modules: Series 9475/12-08-51, 9475/12-08-61, 9475/22-08-51 (without Plant STOP), 9475/22-08-61 (without Plant STOP)
